TN, MS) - R3, R4 and R5

Hi Chris,

1) Please go to EPA's CDX Central Data Exchange to access FERC's one combined *Rover Pipeline, Panhandle Backhaul and Trunkline Projects DEIS* (Rover DEIS). The DEIS is currently out for review and comment. Comments on the DEIS are due at FERC on or before April 11, 2016.

2) The proposed projects in TN and MS (R4) appear to be compressor stations only.

3) R5 is the NEPA review lead on the Rover DEIS since most of the overall proposal is located in R5. R5 will send FERC one EPA DEIS comment letter for R3, R4 and R5. [Note: Tom Uybareta (R3) and Justin Wright, OFA are aware of this project and R5's NEPA lead.]

4) If R4 has any climate change/GHG comments they want R5 to include in EPA's DEIS comment Letter please pass them my way by COB March 4, 2016, so I can pass them along to Justin Wright, OFA to get HQ's timely approval.

5) For all other R4 comments you would like included in EPA's letter, please send them my way by COB March 22, 2016.

Please let me know if these due dates work for you (R4) or not. Also, please feel free to call me if you wish to discuss any of this.

Thank you,

Virginia Laszewski, NEPA R5
